🪪 Profile

As a passionate and dedicated front-end developer with over two years of experience, I specialize in creating dynamic and responsive web applications , includes designing user-centric interfaces and translating them into efficient and scalable code.

💼 Projects

EG-shutter Company Website
Front-End Developer

04/2022 – present
Cairo, Egypt

- Led the development of the website using React and Java script, which increased user engagement by 20%.
- Optimized web applications for speed and scalability.
- Successfully implemented image galleries, modals, and various designs using HiML, CSS, and JavaScript, enhancing the website's functionality and aesthetics.
- Ensured the responsiveness of the website across different devices.

Learning Management System
Senior Front-End Developer

09/2023 – 06/2024

- My responsibilities included collaborating with the design and backend teams to create seamless user experiences, optimizing the frontend for performance and responsiveness, and integrating various features and functionalities into the system.
- Implemented responsive design principles to ensure the LMS was accessible on a variety of devices.
- Contributed to the development of AI features such as speech recognition, document summarization, keyword extraction..

Grocery Store Website
Front-End Developer

- Designed and developed the frontend of the grocery store website, ensuring a seamless user experience for customers browsing and purchasing products.
- Implemented features such as product listings, search functionality, shopping cart management, and checkout process to streamline the shopping experience.
- Integrated payment gateways and shipping functionalities to enable customers to complete their purchases conveniently.

Furniture Website
Front-End Developer

- Designed and developed the frontend of the luxury furniture e-commerce site.

- Implemented features such as product showcases, interactive product galleries, navigation menus, and a secure checkout process.
- Ensured the website was responsive.
- Implemented features such as high-resolution product images, interactive product catalogs and advanced search functionality.

Data Finance Website

Front-End Developer

- Designed and developed the frontend of the data finance website, focusing on creating a clean and intuitive user interface for analyzing financial data.

Burger Website

Front-End Developer

- Developed a fully responsive burger restaurant website using React.js, focusing on user-friendly design and component-based architecture.
Implemented interactive UI elements, routing, and styling to create an engaging user experience.
